

Shaden Alsulami

Cybersecurity Analyst

shadeeen142@gmail.com | 0568684962 | Jeddah, Saudi Arabia | [linkedin.com/in/shaden-alsulami](https://www.linkedin.com/in/shaden-alsulami)

Summary

Cybersecurity graduate and Certified SOC Analyst (CSA) with a strong foundation in offensive and defensive security, supported by internship experience, specialized training, and award-winning academic projects. Experienced in security operations, vulnerability assessment, penetration testing, cloud security, and API security, with a passion for strengthening organizational security and staying ahead of evolving cyber threats. Currently preparing for the Certified Ethical Hacker (CEH) certification to further expand my offensive security expertise.

Professional Experience

Information Security Intern, King Fahd Armed Forces Hospital 06/2025 – 08/2025 | Jeddah, Saudi Arabia

- Supported security monitoring and incident investigation activities through SIEM-based analysis and security event review.
- Contributed to vulnerability assessment and risk assessment activities to identify and evaluate potential security risks.
- Supported a phishing simulation campaign targeting 200+ employees to identify user awareness gaps and support cybersecurity awareness efforts.
- Assisted in reviewing information security policies, access control processes, and asset inventory records to support organizational security governance.

Education

Bachelor of Science in Cybersecurity, University of Jeddah 2021 – 2026 | Jeddah, Saudi Arabia
GPA: 4.9/ 5.0

Certifications & Courses

Certified SOC Analyst (CSAv2)

EC-Council, Jun 2026

Advanced Cybersecurity Training Program

KAUST Academy / NCA / SITE, Apr 2025

Principles of Secure Coding

UC Davis, Jan 2025

Cloud & Wireless Security

KAUST Cybersecurity Program, Dec 2023

Introduction to Cybersecurity Essentials

IBM, Jan 2025

Network Security
(ISC)², Dec 2023

Academic Projects

CloudChainX Guard | Graduation Project, Best Scientific Poster Award 2025 – 2026

Developed a cloud security solution for detecting API-level attacks in cloud supply chain environments.

- Achieved 96% attack detection accuracy and deployed the solution in a simulated AWS environment.
- Awarded Best Scientific Poster at the Innovation & Digital Entrepreneurship Forum 2026. [Project Repository](#)

ML-Based Phishing Website Detection

04/2026 – 06/2026

- Developed a machine learning solution for phishing and malicious website detection.
- Achieved 94.39% classification accuracy and built a real-time analysis interface using Streamlit.

Enterprise Network Security Simulation, University of Jeddah | Network Security Course

04/2025

- Designed and secured a virtual enterprise network using Active Directory, Wazuh, Snort, and pfSense.
- Simulated cyberattack scenarios to strengthen security monitoring and incident detection capabilities.

Additional Training

KAUST Cybersecurity Training Program, KAUST in collaboration with NCA & SITE 2025

Intensive program preparing university students for cybersecurity careers through foundational courses, practical assessments, and real-world security scenarios.

Skills

Technical: Penetration Testing • Web Application Security • API Security • Vulnerability Assessment • Network Security • Cloud Security • Security Operations • Threat Detection & Analysis • Risk Assessment • Digital Forensics • Malware Analysis • OWASP Top 10 • MITRE ATT&CK

Tools & Platforms: Kali Linux • Burp Suite • Nmap • Wireshark • Splunk • Active Directory • Wazuh • Snort • AWS • Docker • Python • GitHub

Personal Skills: Problem Solving • Analytical Thinking • Communication • Teamwork
